**profile**

**profile/surf etiquette**

→ settings + features  
• surf surf habits  
• connect with friends  
• notifications  
• surf etiquette tips

→ user has to choose topics

→ recommendation on top, bottom of kind of topics

time spent on E1  
time spent on E2  
surf status

**surfer stats**

← choosing surf spot

← bars + color coding to see easily if it's crowded

← background top and background bar (current time) some color

← light grid in background to make reading the data easier

← important information! at one glance

← INFORMATION FLOW  
→ most important information

← details  
→ graph of the information and additional data

color coding needed: (color can vary)  
of the wave on their way

Statistics

Status - version A -

Status - version B -

manual buttons  
on my way  
at the wave  
done with surfing  
3 clicks

auto buttons  
on my way  
at the wave  
done with surfing  
1 click

select status  
"on my way"  
"at the wave"  
"done with surfing"

select status  
based on profile, status changes automatically

main function: see how many surfers are currently at the wave or on their way

statistics

at the wave: X  
on their way: X

E1  
at the wave: 5  
on their way: 3

E2  
at the wave: 4  
on their way: 2
